

What is my NEXT STEP?

Before proceeding with any treatment, we'll arrange a private consultation for you with our physician to discuss your personal desires and concerns. During this appointment, various treatment alternatives will be evaluated, post-operative care will be outlined and any risks associated with the procedure will be discussed. You'll carefully review albums of patient photos which serve to illustrate what can and, as importantly, what cannot be accomplished through cosmetic surgery. Naturally, the decision to move forward with any procedure rests entirely with you.
